**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 1 recites the limitation "the corresponding corner portions" in line 8. There is insufficient antecedence for this limitation in the claim. In response to applicants latest response examiner notes that applicant has not changed the passage in questions. Applicant has only added brackets around "((the))". The brackets amount to no change since the last correspondence therefore this rejection still stands.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Anderson (USPN 4,662,532).

With respect to claim 1, Anderson shows a long-side (61) higher than a short-side bank (27), a bottom fitting portion (51,52), and protruding portions (41,42,43,44), and fitting concave portions (64,67,70,70a).

### ***Response to Arguments***

5. Applicant's arguments do not comply with 37.CFR 1.111(c) because they do not clearly point out the patentable novelty which he or she thinks the claims present in view

Art Unit: 3781

of the state of the art disclosed by the references cited or the objections made. Further, they do not show how the amendments avoid such references or objections.

6. Applicant argues that Anderson does not disclose a structure wherein long-side bank portion of the bottom of a large folding container are configured to be higher than short-side bank portion of the bottom. Examiner above has drawn lead lines to figures 1&2 of Anderson more clearly point to the short side and the long side. It can be clearly seen that the long-side bank portion of the bottom of a large folding container are configured to be higher than short-side bank portion of the bottom.

7. In response to applicant's next argument that Anderson does not disclose "concave portions" the examiner views "concave" in this case as hollowed inwardly, and Anderson's concave portions (64,67,70,70a) certainly meets that interpretation.

### ***Conclusion***

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 3781

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
